

Aviso EAS

Aviso EAS (e-Alerts System) provides your members with real-time email notification of transaction events. Through our seamless web-server integration, which includes Symitar's NTMC Home Banking product, members can define e-Alerts for their own specific needs. They can choose the information they want contained in the email, provide more than one email address for specific types of transaction alerts, and more. For example, members can be notified at their business email address when their checking account balance falls below \$100 and on their email-enabled wireless device when it falls below \$20. As a result, your members are consistently informed about their account status wherever they are.

Alerts:

- Low Balance
- Check Clearings
- Direct Deposit
- Debit Card Transactions
- Credit Card Transactions

Notices:

- Courtesy Pay
- Maturing Certificate
- Loan Payment Due
- Reg D Limit Exceeded
- Overdraft Transfer
- Credit Limit Exceeded
- NSF

Benefits:

- Seamless and easy integration
- Real-time e-Alerts to help reduce the risk of fraud
- Member defined e-Alerts for improvement of financial control
