Enhanced multiple transaction efficiencies

Through Symitar's versatile SymForm application, CUTEK's Bulk Transaction Interface allows users to conduct multiple transactions of the same type between different accounts, such as loan payments and share deposits for mailed in and/or drop box transactions.

CUTEK's Bulk Transaction Interface works by allowing users to enter multiple accounts and perform transactions for them. As the transactions are posted, the innovative interface shows the status of the posted transaction and alerts the user of any possible issues with the transactions.

Features:

- Single screen interface for multiple transactions (i.e. check deposits, loan payments)
- Status recap while posting
- Access to multiple accounts
- Option to support regulation CC holds
