

Your Wave of Technology

Prova ID Verification System

Immediately ID your members, reduce fraud

Prova IVS allows your credit union to know whether or not a member has an ID archived in its system. If so, tellers can ID a member immediately, reducing any chance of fraud and providing more efficient service. If not, the system then prompts the teller to scan the member's ID at that time, completing the task in seconds. As a result, this solution allows for instant member recognition with a photo ID onscreen at the teller line. If there's no photo, the member's ID can be scanned on the spot to confirm future visits for faster service.

Features:

- > Instant member recognition with a photo ID onscreen at the teller line
- > Greatly reduces any chance of fraud and provides more efficient service
- > Completes scan of photo ID in seconds if member ID is not in your system
- > Uses Ambir Technology Scanners for hardware requirements
- > Patriot Act compliant

Services

- Custom Programming
- Consulting
