

Your Wave of Technology

Web-based Collections Package

Perfectly scaled to meet your needs

Our web-based collections package is fully customizable, providing your credit union with what you specifically need in a collections package – not overflowing with unused features. Our solution not only integrates with Symitar's™ Episys® system, but its newer programming paradigm allows it to integrate with other core processors as well.

Your credit union can get a collections package that's perfectly scaled to meet your needs, while having the capability to integrate with any core processor and requiring minimum maintenance because of its web-based platform.

Features:

- Web-based technology for easy integration and minimum maintenance
- Newer programming paradigm — modular and plug-in based
- Robust queuing system for enhanced sorting and organizing
- Search member credit reports
- Store credit report info on a SQL server database
- Manage member call actions to adjust action on the spot
- Management dashboard for real time statistics on collector productivity
- External collections productivity tools
